OBJECTIVE

Mobile Application Developer with hands-on experience in Flutter, React Native, and Kotlin. Skilled in Firebase integration, REST APIs, and MVVM architecture. Focused on building clean, scalable cross-platform apps with smooth user experiences.

EXPERIENCE

Gravit InfoSystems Private Limited

Gwalior, M.P.

Flutter Developer Intern

April 2026 – October 2026

- Developing and maintaining Flutter-based mobile features for cross-platform (iOS & Android) production apps
- Integrating Firebase services (Authentication, Firestore, Storage) for real-time data and secure user management
- Collaborating with the team following clean architecture (MVVM) and participating in peer code reviews
- Writing optimized, testable Dart code and ensuring UI responsiveness across different device screen sizes

EDUCATION

Madhav Institute of Technology and Science, Gwalior

Gwalior, M.P.

B.E. Information Technology (AI & Robotics) — GPA: 7.9 / 10

2023 – 2027 (Expected)

Govt. Higher Secondary School Khamariya, Balaghat

Balaghat, M.P.

Class 10: 96% | Class 12: 88.4%

2020 – 2022

PROJECTS

CHAT ROOM APPLICATION (Kotlin · Jetpack Compose · Firebase)

- Built a real-time chat app with room creation and joining, supporting 10+ concurrent users with zero message loss
- Implemented Firestore-backed real-time messaging with live synchronization, achieving <1s message delivery
- Designed a fully responsive UI using Jetpack Compose with smooth navigation and state management

GitHub: github.com/rajvishvakarma088-star/ChatRoomV1-App

GALLERY APPLICATION (Flutter · Dart · Firebase)

- Engineered a cross-platform (iOS & Android) gallery app supporting image viewing, sorting, and recycle bin management
- Built advanced features: in-app image editor, privacy vault with authentication lock, and dynamic wallpaper setter
- Integrated a built-in music player creating a unified media experience alongside the image gallery
- Optimized media rendering pipeline, reducing UI lag by ~40% on datasets of 500+ media files

GitHub: github.com/rajvishvakarma088-star/Photic-gallery-app

AI SALES LOGGER – “DEALZY” (React Native · Firebase · OpenRouter API)

- Built an AI-powered cross-platform (iOS & Android) sales visit logger with automated meeting insights
- Integrated OpenRouter API for AI-generated summaries, cutting manual logging time by ~60% per visit
- Implemented offline-first storage with AsyncStorage and auto-sync with manual retry on reconnection

SKILLS

Languages: Dart, Kotlin, Java, JavaScript, C++, HTML

Frameworks: Flutter, React Native (Cross-platform iOS/Android), Jetpack Compose, Android SDK

Backend: Firebase, Firestore, REST APIs, Node.js (Basic), Express.js (Basic)

Database: Firestore, SQLite, Room, AsyncStorage

Architecture: MVVM, Clean Architecture, State Management

Tools: Git, GitHub, Android Studio, VS Code, APK generation, Play Store deployment

ADDITIONAL

Languages: Conversational proficiency in Hindi and English

Design: Proficient in UI/UX design principles and mobile-first design patterns

Certifications: Android Development – Udemy · Data Structures & Algorithms – Love Babbar (Ongoing)
